SUMMARY

Full-Stack Engineer with 3 years of experience designing event-driven, serverless backend architectures on AWS and building scalable web applications for leading D2C Indian brands (Foftale, Wow Skin Science). Proficient in Node.js, AWS Lambda, SQS, DynamoDB, OpenSearch, ECS Fargate, and IaC via AWS SAM on the backend, paired with Next.js, React.js, and Strapi on the frontend. Passionate about AI/ML and deep learning, with solid DSA fundamentals, eager to contribute to teams building intelligent, high-scale applications.

TECHNOLOGY SKILLS

Frontend :	React, Next.js, Redux, TypeScript, Tailwind CSS, Strapi (Headless CMS).
Backend :	Node.js, GraphQL (AppSync), REST APIs (API Gateway), AWS Lambda, DynamoDB RDS(Postgresql), MongoDB, OpenSearch, Amazon Cognito
Cloud & DevOps :	Cloudflare (Workers, Pages, R2, OpenNext.js), AWS ECS (Fargate), S3, CloudFront, IAM, SQS, SNS, Systems-Secrets Manager, Route 53, CloudWatch, CloudTrail CI/CD (GitHub Actions), IaC (AWS SAM)
Other languages:	Python, C++

WORK EXPERIENCE

SDE-2 | VideoSDK

Jan 2026 - March 2026

- Revamped and enhanced an existing dashboard built with **Next.js**, improving performance and usability.
- Developed and integrated REST APIs for **Voice AI agents** with deployment option on dashboard using Express.js backend.
- Worked with **FFmpeg**-based media processing within VideoSDK's recording pipeline for audio/video capture, format conversion, and stream packaging into **HLS segments** for both live and playback URLs.
- Implemented **post-session transcription** and **AI summary generation** integrated with the HLS/RTMP recording pipeline, enabling automated meeting intelligence on recorded sessions.
- Resolved issues in **meeting pagination** and implemented **adaptive subscription** using Intersection Observer, optimizing frontend performance and resource usage.

Full-Stack Engineer | DevX Technology (devx ai labs

June 2023 - Dec 2025

- Designed and implemented an **event-driven order processing system** using **AWS SQS (with Lambda event source mapping)** for asynchronous workflow execution, ensuring reliability and scalability.
- Developed **ECS Fargate tasks** for **compute-intensive operations** including bulk exports, product updates, coupon generation, and review uploads, improving performance and scalability of admin workflows.
- Implemented real-time **DynamoDB → OpenSearch** sync via **DynamoDB Streams**, enabling efficient search, filter, and sort operations across large datasets.
- Integrated **Gokwik** and **Razorpay** payment gateways with **webhooks** and **DLQ-based refund handling**, improving fault tolerance and transaction consistency.
- Built and deployed scalable **Next.js** and **React.js** applications for multiple D2C brands, integrating **Strapi (Headless CMS)** and **AWS Serverless architecture** via **AWS SAM (IaC)**.
- Migrated Buywow's **Next.js** frontend from **Vercel to Cloudflare (OpenNext + Wrangler)**, reducing **hosting costs** by **60% on Vercel** and **90% on CloudFront**.

- Integrated **Gupshup**, **AWS SES**, and **Pinpoint** for real-time customer communication, order updates, and email delivery.
- Integrated backend event tracking via **Pixel Conversion APIs (CAPI)** and automated tracking for **MoEngage**, **Meta Pixel**, **GA**, via **GTM**, enhancing marketing analytics and conversion attribution.
- Enhanced monitoring via **SNS Slack notifications**, **CloudWatch**, and error handling pipelines via **DLQs**.

PROJECTS

Foxtale (foxtale.in [↗](#)) — D2C Skincare Storefront

- Led the migration of the storefront from Shopify to a Custom Next.js frontend, improving performance, flexibility, and developer experience.
- Integrated **Strapi** as a headless CMS for managing dynamic content, enabling the marketing team to update pages without engineering involvement.
- Implemented end-to-end tracking of key user journeys (PDP views, ATC, Checkout, Purchase) via **Mixpanel** to support conversion rate optimization.

Buywow (buywow.in [↗](#)) — E-commerce Platform

- Replaced **Lambda@Edge** with **Cloudflare Workers** for on-the-fly **image processing** and **CDN optimization**.
- Migrated the frontend deployment from **Vercel** to **Cloudflare** (Workers + R2 + Durable Objects) via **OpenNext.js**, optimizing **ISR** builds and reducing infrastructure cost
- Built a custom **React.js Admin Panel** using **TypeScript**, **Redux Toolkit**, and **Tailwind CSS** for managing products, orders, coupons, reviews, , memberships, and order workflows.
- Developed interactive features: collection-level nudges, membership functionality, loyalty promotions with redeemable cashback, and spin the Wheel gamification to boost engagement and conversion.

Nature Derma (naturederma.com [↗](#))

- Implemented **ISR** with page-level revalidation and dynamic caching in Next.js for optimised, up-to-date content delivery.
- Managed **10K+ redirects via middleware** for optimized URL structure and page revalidation.
- Integrated **Uncommerce** for inventory synchronization and order fulfillment automation.
- Integrated loyalty program where users **earn and redeem reward points** (Cupid coins) with configurable caps and usage rules.
- Designed an SEO-optimized **XML schema** with a **sitemap**, enhancing search engine visibility and indexing.
- Implemented comprehensive event tracking for Meta Pixel, MoEngage, and GA via **GTM**, , enabling data-driven marketing insights and conversion optimization.

EDUCATION

B.Tech in Computer Engineering

BVM Engineering College,
Anand, Gujarat. CGPA : (8.90/10)

Aug 2020 - May 2024

HSC (Physics,Chemistry,Maths)

P.P.Savani Vidyalaya,
Surat, Gujarat. PER : (82.1/100)

June 2018 - Mar 2020
